Dr. R.L. Kirk,
John Curtin School of Medical Research
Australian National University,
Canberra A.C.T. 2601.

17th July 1970

Dear Dr. Kirk,

Thanks very much for the last batch of results. The remaining five or so in this series are coming a day later than expected, so I shall send them on to you on Monday, on the same flight.

Although it is too early to say anything definite, there appears to be less variation in Y length in this batch from the Centre than in either those from the Darwin area, or in a Caucasian control group I am looking at. I probably will need further samples to clarify this point.

With kind regards,

Yours sincerely,

Roslyn Angell
