Dr. R.L. Kirk,
John Curtin School of Medical Research,
Australian National University,
Canberra, A.C.T.

2nd July 1970.

Dear Dr. Kirk,

Sorry I wasn't able to give you a little more warning before sending the last batch of blood samples on to you. I was caught rather unawares myself, although fortunately they all seem to have cultured quite well. They were collected by Kerry Kirke and are all reputedly of full Aboriginal descent.

I have written to him asking for a further five samples, again from the Alice Springs area, and am expecting them on Thursday 9th July. On the assumption that it will be all right with you, I will arrange for them to be on the same ^{Friday} TAA flight No.426 due into Canberra at 2.35 p.m.

With many thanks again for your help.

Yours sincerely,

Roslyn Angell
